America's Cities: Centers of Higher Learning

This study measures the higher education capacity of America's 60 largest Metropolitan Statistical Areas (MSAs) in terms of students enrolled, degrees awarded, and direct spending by institutions. It updates research released by the Atlanta Regional Consortium for Higher Education (ARCHE) in April 1999 and January 2001.

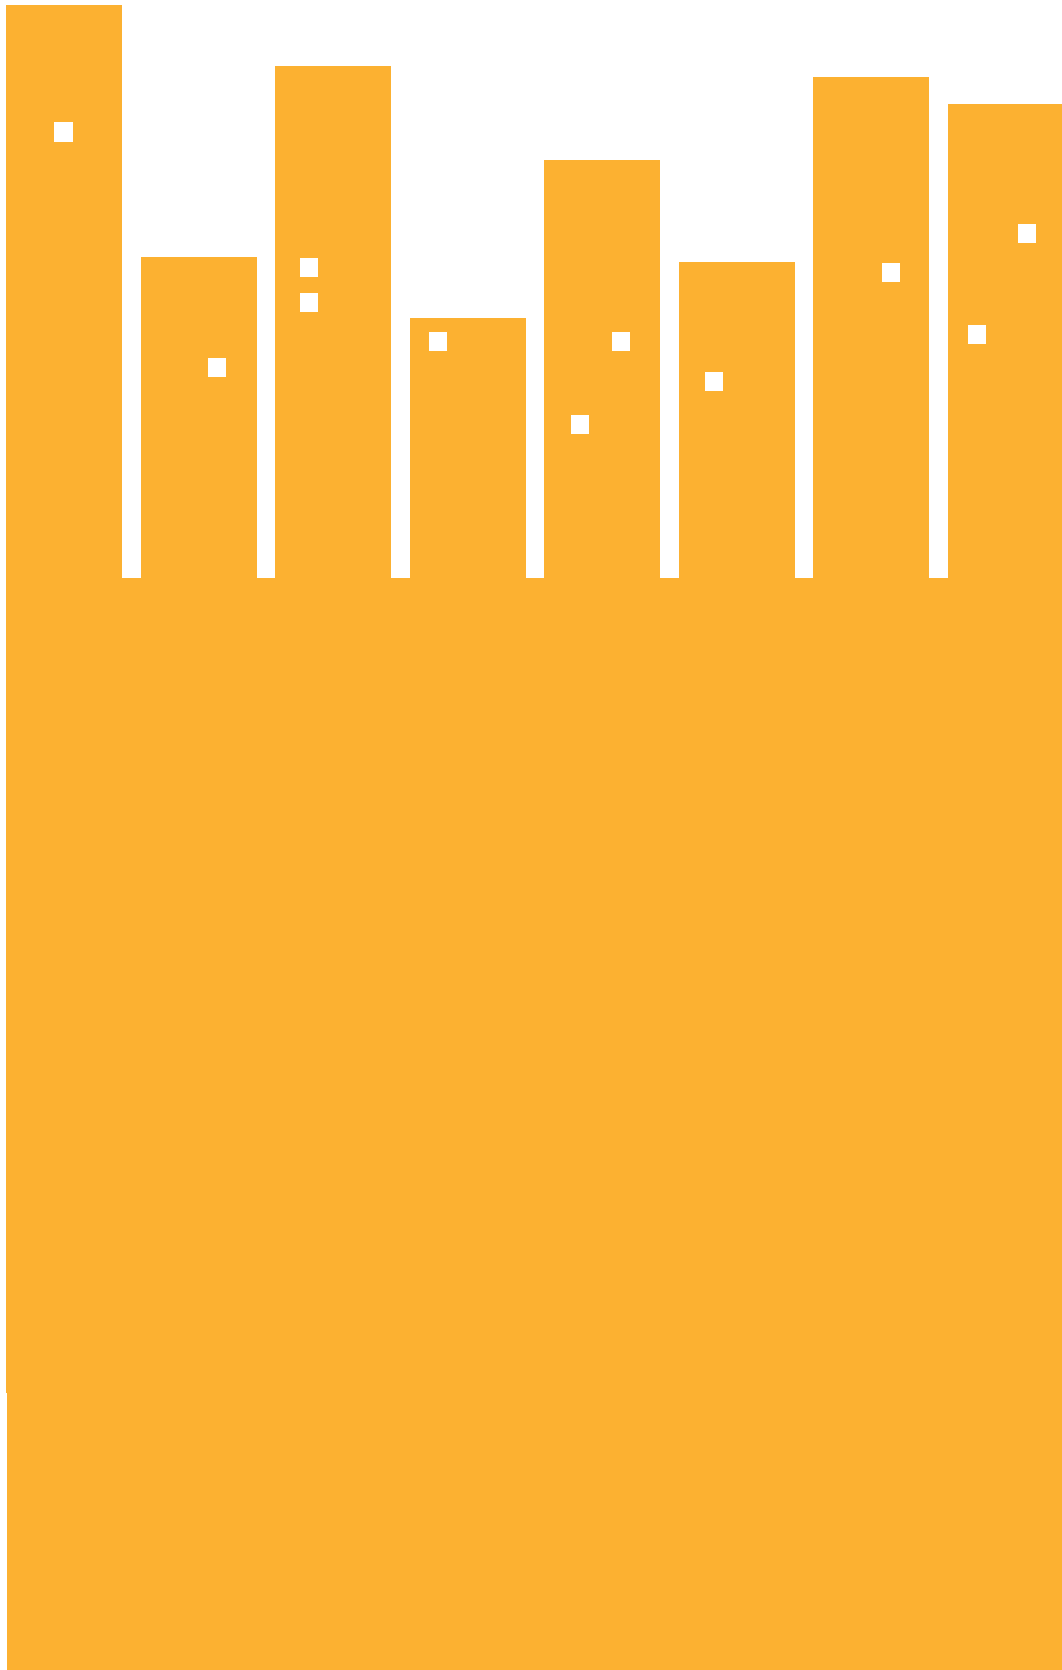

Knowing the collective size and scope of higher education in a metro region makes it easier to recognize the vast resources that colleges and universities offer a community. Consequently, the rankings and data in this report are information tools that regions can use to better understand and leverage local higher education expertise, research, and services.

It's often said that great cities need great universities and colleges, but it's also true that great universities and colleges need great cities. This is the mutually beneficial relationship that exists in the Atlanta region. ARCHE hopes this report encourages metro areas and institutions of higher learning across the U.S. to find new ways of working together.

Please visit www.atlantahighered.org to learn more about ARCHE.

Notes on the Study

This study measures higher education activity in America's largest Metropolitan Statistical Areas (MSAs).

- > The U.S. Office of Management and Budget defines metropolitan areas according to published standards that are applied to U.S. Census Bureau data. The general concept of an MSA is that of a core area containing a large population nucleus, together with adjacent communities having a high degree of economic and social integration with that core. MSAs are relevant units of analysis because of their importance as population centers and as engines of national and regional economic life. For purposes of this study, when an MSA is located in a Consolidated MSA, the unit of measure is the Primary MSA (PMSA, as noted in the tables).
- > This study is based on the 60 largest MSAs in order to provide broad representation of regions across the nation. Determination of the 60 largest MSAs is based on April 1, 2000 population data.
- > All higher education data is from Federal Integrated Postsecondary Education Data System (IPEDS) surveys completed by degree-granting institutions approved to receive Federal student aid. These surveys are conducted by the U.S. Department of Education (DOE).
- > Because the DOE releases IPEDS survey data in a continuing series of re-releases, this study is based on the latest data available as of January 2003. Consequently, enrollment and degree data is from academic year 2000-01, expenditure data is from fiscal year 1999-2000, and staffing data is from 2001-02. The study includes enrollment data from 1,570 institutions located in the 60 MSAs, degree data from 1,526 institutions, and expenditure data from 1,501 institutions (staffing data is from 1,285 institutions).
- > Data for the Atlanta MSA includes 45 colleges, universities, and other institutions of higher learning (the University of Georgia, located immediately adjacent to the Atlanta MSA, is included in the data as a member of ARCHE).
- > Full-Time-Equivalent (FTE) enrollment data is reported in this study because of its widespread use for budgeting purposes in higher education. The formula for this calculation is: $1/3$ the number of part-time students + the number of full-time students = FTE enrollment.
- > Degree data reported in this study reflects degrees awarded at the Bachelor's level and higher, including Master's, Doctoral, and Professional degrees.
- > Because of the use of more recent data and differences in cohort institutions, information in this study is not directly comparable to that reported in MSA Study No. 1 (released in April 1999) or MSA Study No. 2 (released in January 2001).
- > The failure of any institution of higher education to file complete and accurate IPEDS surveys with the DOE may affect the ranking of the MSA in which that institution is located.

The Atlanta Region: A Higher Education Leader

The Atlanta region is a national leader in higher education, consistently ranking in the top 10 metro areas in key measures of higher education activity.

- > Atlanta is rich with collegiate life and learning:
 - 180,119 total students enrolled
 - Equates to 138,548 full-time-equivalent students
 - Ranking the region 7th among U.S. metro areas
- > Atlanta is a focal point of higher education opportunities for students of color:
 - Ranking 8th in total enrollment of students of color
 - 3rd in enrollment of African-American students
- > Students in the Atlanta region not only pursue a higher education – they complete it:
 - 28,681 graduates with Bachelor's degree or higher
 - Ranking the region 6th in the U.S.
- > Atlanta ranks in the top 8 in degrees conferred across a range of fields, including:
 - Engineering, computer/info sciences, math, physical sciences, biological/life sciences, health professions, architecture/related programs, business, communications, education, visual/performing arts, theological studies, and English language/literature
- > Colleges and universities are key drivers in Atlanta's regional economy:
 - \$4.6 billion in total institutional expenditures
 - Ranking Atlanta 6th in the nation
 - 48,791 total staff employed
 - Ranking the region 7th
- > Atlanta is a national center for higher education research:
 - \$731 million in total research expenditures
 - Ranking Atlanta 4th in the nation

This report is a project of the Atlanta Regional Consortium for Higher Education (ARCHE). Founded in 1938, ARCHE is comprised of 19 public and private institutions of higher learning. Membership also includes corporate and non-profit Community Partners and regional Affiliated Libraries. The Consortium's mission is to advance Atlanta-area higher education through academic collaboration, community partnerships, and public awareness.

The study was performed by Human Capital Research Corporation, a firm that provides research and analysis services in the areas of higher education institution operations, educational productivity, enrollment management, work force development, and public policy. For more information, contact: hcrc@humancapital.com.
